

ShareSync

ShareSync combines file backup with business grade sync and share for complete file management. Plus advanced anti-malware/antivirus protection from Bitdefender. See how ShareSync compares to the competition.

Real-time backup with point-in-time restore

Easy and secure file sharing and collaboration

Mobile access to files from any device

Advanced anti-malware/antivirus to protect against cyber threats like ransomware

Full management and control over data, users, and devices
